

## **A genocide with international blessing**

### **Stop the Zionist occupation massacres in Gaza**

In an epilogue to the ethnic cleansing crimes, the Zionist occupation army directly targeted the Al-Ahli Baptist Hospital in Gaza on the evening of Tuesday, October 17, 2023. This resulted in an initial toll of more than 500 martyrs and hundreds of injured. The hospital provided shelter not only for patients and medical staff but also for a large number of displaced Palestinian families seeking refuge from the ongoing bombardment.

In the face of what Gaza is experiencing, from a barbaric war against civilians, to a relentless siege, and a systematic displacement to seize its lands, in clear violation of international treaties, namely the Geneva Convention on the Protection of Civilians in Time of War (1949), and in a form that can be described as nothing but brutal, Faced with the hubris of the occupying authority, its continued perpetration of war crimes against Palestinians, and its commission of genocide with overt complicity from the international community,

#### **Al Bawsala organization declares that:**

- We strongly condemn the crimes against humanity and the genocide taking place in Gaza, aimed at annihilating the Palestinians of Gaza, displacing those who remain, and liquidating the Palestinians' right to freedom and land.
- We denounce the international community's double standards and its silence and complicity in crimes against humanity, particularly the United States, the United Kingdom, France, and Japan governments who rejected the Security Council resolution calling for a humanitarian ceasefire. Their support for the occupation served as a cover for its continued savage attacks on civilians.
- We reiterate our solidarity and unwavering support for the Palestinian people and their legitimate right to resist the racist and inhumane policies of the occupation. We also call for the immediate end to the Zionist occupation that must be held accountable for its crimes.
- We are committed to engaging in all initiatives of solidarity with and support to the Palestinian people.
